

## QUESTIONS:

1. What is your occupation and your position to the job?
  - My occupation is about computers. I am a Application Systems Engineer
2. How long have you been working with this job?
  - About 2 years
3. What skills or characteristics should someone have in your field?
  - A problem solver. must be dedicated to solve a given problem. must continue to learn and open to new technologies
4. What do you think is/are the problem/s in your work? How do you handle those problems in your job?
  - Every job is a stressful job. Since I am working from home, I can balance my time and do some stress reliever activities like raising some chickens, planting some trees in our front yard.
5. What is the best thing or your favorite part about your occupation? (*e.g., benefits, salary, flexible working hours?*) Why?
  - Working from Home. I can spend quality time with my family
6. How did you achieved the position you are holding now?
  - Since I am a career shifter, from non-IT to IT, I have self studied some programming language that makes me achieve the position/job I am with right now. I may also consider a bit of luck to the equation.
